Arten Science Limited have announced myVault - their Secure Encrypted Personal Information, File and Document Management Solution. Next Generation • Easy to Use • Powerful • Secure • myVault to file them all, myVault to store them. myVault to secure them all and in the future find them.

[prMac.com] Ripley, United Kingdom - Arten Science Limited have announced myVault - their Secure Encrypted Personal Information, File and Document Management Solution. Next Generation • Easy to Use • Powerful • Secure •

**** myVault to file them all, myVault to store them. myVault to secure them all and in the future find them ****

myVault is a Secure Digital Filing System, allowing you to drag and drop your PDF files, JPG files, DOC files, MP3 files etc. into myVault, enabling them to be filed away but quickly and easily located and used at a later date.

myVault provides alternative views of your data using either the Main window, the Grid View or the Document Viewer. Access your data in the way you find most convenient.

myVault is focused on the storage and subsequent fast retrieval of Items, Documents and Files, using any word, or part of a word, contained in either the item title or descriptive text. myVault does not search the contents of your files.

If you use several devices then myVault can be used with Dropbox (other Cloud Storage is available) to allow your Items and Documents to be synchronised via the Internet.

Another useful feature of myVault is that Items and Documents within myVault can be encrypted. This allows you to use myVault to store confidential information such as Passwords, Serial Numbers, Credit Card Numbers, Bank Details Etc. You have the option, on an item by item basis, to secure your confidential information using up to 384 Bit Blowfish Encryption.

A Unique feature of myVault is that it is supplied free of charge with new purchases of ContaxCRM or it can be purchased separately. Direct integration with ContaxCRM, our CRM Contact Management package means that your Item and Documents can be attached seamlessly to contacts that exist within your CRM software. This link can be seen and utilised both from within myVault and from within ContaxCRM.

The cross platform nature of myVault means that should you use a Windows PC and a Mac computer then they can both access the same myVault database without any problems. Your serial number after purchase covers you for two computers which can be Macs, PC's or one of each.

Download myVault for an unrestricted 30 Day Trial. At the end of 30 Days you can purchase a Serial Number which will convert your software to the Full Version while leaving all your information, documents and data intact.

Functionality and Features:

- * Easy to use, Modern, Clean Interface
- * Requires No Installation
- * Requires no additional Runtime installation
- * Can be run from a USB drive if required
- * Sync the Database with Dropbox / iDisk or Similar
